STEP 1

Design and manufacture

We process the associated materials in our factory, and design them as aroma diffusers during the production process.

STEP 2

Pack products into cartons

Our team took a short time to pack the goods into cartons

STEP 3

Clearance and loading

Products are loaded on the truck. Once they pass the custom clearance. The drivers will move them to a different point of distribution.

STEP 4

Sea Shipping and transportation

Once the goods arrive at their destination. An alert will be sent to you. Then you can plan how to collect the products.

The process of producing aroma diffuser

This is what we do when we manufacture the wholesale aroma diffusers

1 Design the aroma diffusers
ID designers turn new ideas into drawing of aroma diffuser, the design process requires consideration of the product's function, lighting, materials, mist elimination, structure and other details. Make it stand out

2 Prototype sample of aroma diffuser
The R&D team will create a prototype of aroma diffuser based on the confirmed 3D drawing. The prototype is a sample with function and preliminary appearance effect.

3 Layout design of PCB
The electronics engineer will make the PCB layout design based on specific product features and create sample for verification.

4 Mold making of aroma diffusers
The mold engineers began to create mold design designs, and then make the aroma diffuser mold filling the liquid polyresin after reviewing the design.

5 Manufacture aroma diffusers
The workers sort all materials, assemble the main parts according to SOP's only, and conduct multiple functional tests

6 Inspect the finished products
It is key processes, the related quality tests include: accelerated aging, low temperature testing, high temperature testing, solder testing, PCB inspection, critical component testing, LED light testing, and mist output testing.

Problems with my order? Things you Need to Know

To save you from troubles, here are a few facts you need to know about our diffuser supplies.

Why does my aroma diffuser make noise?

According to the strength of your aroma diffuser's motor and fan, it is normal to feel the noise while operating. If you hear some sound of water inside the tank, it is a normal phenomenon. If the aroma diffuser makes a noise that sounds strange, stop using it and contact our customer service team

Do I have to clean my aroma diffuser?

We recommend using tap or bottled water for all of our aroma diffusers, in addition the temperature of the water will also affect the mist spray, warmer water will generate a better effect of mist, colder water will suppress the ultrasonic vibration and generate few mist

How do I clean my aroma diffusers?

Please be sure to use 100% pure essential oils, which can extend the life of the aroma diffuser, if you use fragrance oil, will affect the life of the aroma diffuser. if you use an aroma diffuser very often, we recommend that you use white vinegar to clean it every week, in addition, when you do not use it, do not let the water and oil stay in the aroma diffuser, which will cause oil stains to get stuck in the water tank

How do i operate my aroma diffuser

Many of the diffusers we sell have different functions, please read your manual to learn how to operate your product correctly

May I customized my favorite design?

For clients who order the aroma diffuser in bulk, we accept the requests, pls reach out to us by the form below.

How much time will it take to receive the goods

Generally about 30 days for non-customized products and about 35-40 days for customized products, depending on the complexity of your customization needs
